HI-MAG in Leipzig is looking for a Student Assistant (SHK)

Starting date: as soon as possible (with long term perspective)
Working time and salary: 8 – 10 h a week (during semester break up to 19h/week)
Place: Research Labs in the Max-Bürger Forschungszentrum – Johannisallee 30, 04103 Leipzig

The Helmholtz Institute for Metabolic, Obesity and Vascular Research (HI-MAG) at the University of Leipzig is part of Helmholtz Munich and aims to uncover the molecular underpinnings of metabolic, obesity and vascular disorders to enable precision therapies. As one of the world’s leading research institutes, Helmholtz Munich is a highly driven and stimulating international environment. Together with renowned scientists and supported by state-of-the-art infrastructure, you will have the opportunity to make important contributions towards scientific knowledge and the improvement of people’s quality of life.

The Vascular Epigenetics group (https://www.helmholtz-munich.de/hi-mag/) at HI-MAG is now recruiting a Student Assistant.

Your tasks:
- Undertaking genotyping through PCRs and gel electrophoresis
- Preparation of plasmids via minipreps and maxipreps
- Cloning of plasmids for cell biology experiments
- Help with preparation for experiments by organizing required materials (e.g. preparing glassware and autoclaving)

Requirements:
- Current enrolment as a student in life sciences (Bachelor’s or Masters) or medicine
- Ability to communicate in English
- Good organisational skills
- Reliability
